GOV. JUNESON'S ADDRESS.

During the next period of ten years, bringing as to Billi, the agriculture of the county appears to have been in a tensition state. The war in Europe to decised. The nations of the earth were at peace. The gands had returned to the peaceful irt of agriculture. New York had con amorged the great ward of the agerns it was then consider-oil, and her rivids, Pennsylvania and Maryland, hid-"market on the scaboard. An immune territory of market on the scalourd. An immense territory of the most feetile character, and flavotable to the growth of gram, was enabled to bring the surplus of her character, and flavotable to the growth of gram, was enabled to bring the surplus of her character, and trends the surplus territory of the consequence was, that flour which had borne an average prace for ten years, from 18(0 to 1819, of eight dollars and twenty eight cents the barret, and from 1810 to 1820 of nine dollars and seventy-six cents the barret, from 1820 to 1830 character the barret. From 1830 to 1840 to 1840 the surplus of the sound, seemined with other cross the barret. From 1830 to 1840 to 1840 the average prace was consistent to 1840 the fifty four cents the barret was consent by the short crops of 1830 and 1840, calling for measure importations to act per the context and measure importations for a per the context and measure importations for a per the context and measure inportations for a per the context and measure importations for a per the context and measure in the first and fifty to afford greater net profits, all the age on solved, then any other. This being the case, if may be well for a ring sleep interest to proceed the context of the cont

v on the agriculture of the county.
While some of the formers had, as a main husisuper promote or the county of exportation. They still persisted in the bosiness, notwithstanding the increasing failures in the crop, caused by the extension of the soil, ravages of the Hessian Hy, spring killing, hight or rust. But in 1827 or 1828, the last of the wood in ed. She and this result follow, the last of the last of the last of the wood in ed. She and this result follow. an enemy to the whost crops appeared, which hat, the law of apply end depend oil, in the end fled all the effort of the farmer to evade. This is an ake the raising of each had equally profind to sect continuously but improperly called the weetil,—
that mane belonging to an insect that preys on the
